INDEPENDENT AUDITORS REPORT TO

THE MEMBER OF EQSTRA CORPORATION (PROPRIETARY) LIMITED

We have audited the accompanying financial statements of Eqstra Corporation (Proprietary) Limited, which comprise the statement of financial position as at 30 June 2010, the statement of comprehensive income, the statement of changes in equity and statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes, as set out on pages 3 to 37.

Directors' responsibility for the financial statements

The company's directors are responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and in the manner required by the Companies Act of South Africa.

This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Eqstra Corporation (Proprietary) Limited as at 30 June 2010, and of their financial performance and their cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Companies Act in South Africa.

ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of the financial statements are set out below and are consistent in all material respects with those applied during the previous year. 1.1. Basis of preparation

The company financial statements are stated in rands and are prepared in accordance with and comply with International Financial Reporting Standards (IFRS) and International Financial Reporting Interpretations Committee (IFRIC) interpretations issued and effective for the company's financial year. The financial statements have been prepared on the historical cost basis except for the revaluation of financial instruments. Historical cost is generally based on the fair value of the consideration given in exchange for assets. These accounting policies are consistent with the previous year.

1.2 Intangible assets

Expenditure on acquired patents, trademarks, licences and computer software is capitalised and amortised using the straight-line basis over their useful lives, generally between two and eight years. These intangible assets are recognised if it is probable that economic benefits will flow to the entity from the intangible assets and the costs of the intangible assets can be reliably measured. Intangible assets are not revalued. The carrying amount of each intangible asset is reviewed annually and adjusted for impairment, where it is considered necessary.

1.3 Impairment of tangible and intangible assets excluding goodwill

At each reporting date, the company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss, or whether an impairment loss recognised in a previous period has reversed or decreased. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss or reversal (if any).

Where the asset does not generate cash flows that are independent from other assets, the company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

An intangible asset with an indefinite useful life is tested for impairment annually and whenever there is an indication that the asset may be impaired. The assessment that the useful lives are indefinite are assessed at least

The recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects the current market assessment of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised as an expense immediately.

Where an impairment loss subsequently reverses, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for

Impairment losses recognised on goodwill relating to a cash-generating unit are not reversed in a subsequent 7

ACCOUNTING POLICIES (continued)

1.3 Impairment of tangible and intangible assets excluding goodwill (continued)

A reversal of an impairment loss is recognised only if there has been a change in the estimates used to determine the asset's carrying amount. A reversal of an impairment loss is recognised in income immediately.

Land is reflected at cost and is not depreciated. New property investments and developments are reflected at 1.4 Property, plant and equipment and leasing assets cost, which includes holding and direct development costs incurred until the property is available for

Cost also includes the estimated costs of dismantling and removing the assets and where appropriate the cost is split into significant components. Major improvements to leasehold properties are capitalised and written off over the period of the leases.

All other assets are recorded at historical cost less accumulated depreciation and any accumulated impairment losses. Depreciation is calculated on the straight-line basis to write off the cost of each component of an asset to its residual value over its estimated useful life as follows:

20 years 3 to 10 years Buildings Equipment and furniture 3 to 5 years Motor vehicles 3 to 10 years Leasing assets

The depreciation methods, estimated remaining useful lives and residual values are reviewed at least annually. Where significant components of an asset have different useful lives to the asset itself, these components are depreciated over their estimated useful lives.

When the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount. An impairment loss is recognised as an expense immediately.

Where a reversal of a previously recognised impairment loss is recognised, the depreciation charge for the asset is adjusted to allocate the asset's revised carrying amount, less residual value, on a systematic basis over its remaining useful life.

Gains and losses on disposal are determined by reference to their carrying amount and are taken into account in determining operating profit.

Borrowing costs directly attributable to the acquisition, construction or production of assets that necessarily 1.5 Capitalised borrowing costs take a substantial period of time to get ready for their intended use or sale, are capitalised to the cost of those assets until such time as the assets are substantially ready for their intended use or sale. Where interest is earned on the temporary investment of borrowed funds, this income is set-off against the finance costs eligible for capitalisation.

ACCOUNTING POLICIES (continued)

1.6 Inventories

Inventories are stated at the lower of cost or net realisable value, due recognition having been made for obsolescence and redundancy. Net realisable value is the estimate of the selling price in the ordinary course of business, less the costs of completion and selling expenses. Cost is determined as follows:

Vehicles

Specific cost

Spares, accessories and finished goods

Weighted average cost

Merchandise

First in, first out

Work in progress includes direct costs and a proportion of overhead costs but excludes interest expense.

1.7 Financial instruments

Financial instruments are initially measured at fair value when the company becomes a party to the contractual provisions of the contract. Subsequent to initial recognition, these instruments are measured as set out below.

Equity and debt security instruments

Equity and debt security instruments are initially recognised at cost on trade date.

At subsequent reporting dates, debt securities that the company has the intention and ability to hold to maturity (held-to-maturity debt securities) are measured at amortised cost, excluding those held-to-maturity debt securities designated as fair value through profit or loss at initial recognition, less any impairment losses recognised to reflect irrecoverable amounts. Premiums or discounts arising on acquisition are amortised on the yield-to-maturity basis and are recognised in profit or loss.

Equity and debt security instruments other than held-to-maturity debt securities are classified as either fair value through profit and loss or available for sale, and are measured at subsequent reporting dates at fair value.

Where equity and debt security instruments are held for trading purposes, gains and losses arising from changes in fair value are recognised in profit or loss for the year.

Available-for-sale investments and gains and losses arising from changes in fair value are recognised in other comprehensive income, until the security is disposed of or is determined to be impaired, at which time the cumulative gain or loss previously recognised is recognised in profit or loss for the year.

Loans receivable

Loans are recognised at the date that the amount is advanced.

At subsequent reporting dates they are measured at amortised cost, less any impairment losses recognised to reflect irrecoverable amounts.

Trade and other receivables

Trade and other receivables originated by the company are initially stated at fair value and reduced by appropriate allowances for doubtful debts. These allowances are recognised in profit or loss.

ACCOUNTING POLICIES (continued)

1.7 Financial instruments (continued)

Cash and cash equivalents

Cash and cash equivalents are measured at carrying value which is deemed to be fair value.

Loans payable

Interest-bearing loans are initially recorded on the day that the loans are advanced at fair value.

At subsequent reporting dates, interest-bearing borrowings are measured at amortised cost. Finance charges, including premiums payable on settlement or redemption and direct issue costs, are accounted for on the accrual basis in the income statement using the effective interest rate method, and are added to the carrying amount of the instrument to the extent that they are not settled in the period in which they arise.

Where interest-bearing loans have interest rate swaps changing the interest rate from fixed to variable or vice versa, they are treated as hedged items and carried at fair value. Gains and losses arising from changes in fair value are included in other comprehensive income.

Where the company has the intention to repurchase its own interest-bearing loans in a recognised marketplace, such loans are designated as held for trade and are carried at fair value. Gains and losses arising from changes in fair value are included in the income statement for the year.

Trade payables

Trade payables are stated at their fair value and subsequently stated at amortised cost.

Derivative instruments

Derivative financial instruments are initially recognised at fair value, and subsequently measured at fair value. The company uses derivative financial instruments primarily relating to foreign currency protection and to alter interest rate profiles.

The company designates certain derivatives as hedging instruments. They are classified as:

- fair value hedge: a hedge of exposure to changes in fair value of recognised assets and liabilities;
- cash flow hedge: hedges a particular risk associated with a recognised asset or liability or a highly probable forecast transaction; and
- hedges of a net investment in a foreign operation.

Foreign currency forward contracts (FECs) are used to hedge foreign currency fluctuations relating to certain firm commitments and forecast transactions.

Interest rate swap agreements can swap interest rates from either fixed to variable or from variable to fixed and are used to alter interest rate profiles.

Any gains or losses on fair value hedges are included in profit or loss for the year.

Changes in the fair value of derivative financial instruments that are designated and effective as hedges of future cash flows are recognised directly in other comprehensive income and any ineffective portion is recognised immediately in the income statement.

ACCOUNTING POLICIES (continued)

1.7 Financial instruments (continued)

If the cash flow hedge of a firm commitment or forecast transaction results in the recognition of an asset or a liability, then, at the time the asset or liability is recognised, the associated gains or losses on the derivative that had previously been recognised in equity are included in the initial measurement of the asset or liability. For hedges that do not result in the recognition of an asset or a liability, amounts deferred in other comprehensive income are recognised in the income statement in the same period in which the hedged item affects the income statement.

Derivatives embedded in other financial instruments or non-derivative host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of host contracts and the host contracts are not carried at fair value with fair value gains or losses reported in the income statement.

Investments are fair valued based on regulated exchange-quoted ruling bid prices at the close of business on the last trading day on or before the reporting date. Fair values for unquoted equity instruments are estimated using applicable fair value models. If a quoted bid price is not available for dated instruments, the fair value is determined using pricing models or discounted cash flow techniques. Any unquoted equity instrument that does not have a quoted market price in an active market and whose fair value cannot be reliably measured is stated at its cost, including transaction costs, less any provisions for impairment.

All other financial assets and liabilities fair values are calculated by present valuing the best estimate of the future cash flows using the risk-free rate of interest plus an appropriate risk premium.

Derecognition

The company derecognises a financial asset when its contractual rights to the cash flow from the financial asset expire, or if it transfers the asset together with its contractual rights to receive the cash flows of the financial assets.

The company derecognises a financial liability when the obligation specified in the contract is discharged, cancelled or expires.

1.8 Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The company as lessor

Finance leases

Amounts due under finance leases are treated as instalment credit agreements.

Operating leases

Income is recognised in the income statement over the period of the lease term on the straight-line basis,

Assets leased under operating leases are included under the appropriate category of asset in the statement of financial position. They are depreciated over their expected useful lives on a basis consistent with similar items of property, plant and equipment.

ACCOUNTING POLICIES (continued).

1.8 Leases (continued)

The company as lessee

Finance leases

Leases where the company assumes substantially all the risks and rewards of ownership, are classified as finance leases.

Assets held under finance leases are capitalised as assets of the company at the lower of fair value or the present value of the minimum leases payments at the inception of the lease. The capitalised amount is depreciated over the assets useful life. Lease payments are allocated between capital payments and finance expenses using the effective interest rate method.

The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation. Finance costs, which represent the difference between the total lease commitments and the fair value of the assets acquired, are charged to the income statement over the term of the relevant lease.

Operating leases

Operating lease costs are recognised in the income statement over the lease term on the straight-line basis. When an operating lease is terminated before the lease period has expired, any payment required to be made to the lessor by way of penalty is recognised as an expense in the period in which termination takes place.

1.9 Share-based payments

The company operates equity-settled share-based compensation plans for senior employees and executives.

Equity-settled share-based payments are measured at fair value at the date of grant using the Binomial Model. The fair value determined at the grant date of the equity-settled share-based payment is expensed on the straight-line basis over the vesting period with a corresponding entry to equity. The expense takes into account the best estimate of the number of shares that are expected to vest. Non-market conditions such as time-based vesting conditions and non-market performance conditions are included in the assumptions for the number of options that are expected to vest. At each reporting date, the entity revises its estimates on the number of options that are expected to vest. It recognises the impact of the revision of original estimates, if any, in the income statement, with a corresponding adjustment to equity.

When the options are exercised, or share awards vest, the proceeds received, net of any directly attributable transaction costs, are credited to share capital (nominal value) and share premium.

1.10 Retirement benefit obligations

The company operates a number of retirement schemes. These schemes have been designed and are administered in accordance with the local conditions and are defined contribution schemes. The pension costs relating to these schemes are assessed in accordance with the advice of qualified actuaries and are expensed as incurred.

1. ACCOUNTING POLICIES (continued):

1.11 Provisions

Provisions are recognised when the company has a present legal or constructive obligation as a result of past events, for which it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made.

Warranty and after-sales services

Where the company sells vehicles and machine inventory on which it will incur warranty and after-sales costs, an estimate of this is made based on past experience.

1.12 Taxation

The charge for current tax is based on the results for the year as adjusted for items that are non-assessable or disallowable. It is calculated using tax rates that have been substantially enacted at the reporting date.

Deferred tax is recognised in respect of temporary differences arising from differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax basis used in the computation of taxable profit.

In principle, deferred tax liabilities are recognised for all temporary differences arising from depreciation on property, plant and equipment, revaluations of certain non-current assets and provisions for pensions and other retirement benefits. Deferred tax assets are raised only to the extent that their recoverability is probable. Deferred tax assets relating to the carry-forward of unused tax losses are recognised to the extent that it is probable that future taxable profit will be available against which the unused tax losses can be utilised.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the company is able to and intends to settle its current tax assets and liabilities on a net basis.

1.13 Revenue recognition

Revenue from the sale of goods is recognised when significant risks and rewards of ownership of the goods are transferred to the buyer.

Where there are guaranteed buy-back arrangements in terms of which significant risks and rewards of ownership have not transferred to the purchaser, the transaction is accounted for as a lease.

Revenue arising from the rendering of services is recognised on the accrual basis in accordance with the substance of the agreement.

Revenue from vehicle maintenance plans is recognised only to the extent of the value of parts and services provided, with the balance being recognised at the end of the vehicle maintenance plan.

Where the company acts as agent and is remunerated on a commission basis, the commission is included in revenue. Where the company acts as principal, the total value of business handled is included in revenue.

Interest income is accrued on the time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's carrying amount.

Dividend income from investments is recognised when the shareholders' right to receive payment is established.

2. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES

The preparation of the company financial statements requires the company's management to make judgements, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The determination of estimates requires the exercise of judgement based on various assumptions and other factors such as historical experience, current and expected economic conditions, and in some cases actuarial techniques. Actual results could differ from those estimates.

The following accounting policies have been identified as involving particularly complex or subjective decisions or assessments:

2.1 Impairment of assets

As outlined in the accounting policies, an impairment loss is recognised when the recoverable amount of an asset is estimated to be less than its carrying amount. In assessing value in use, future cash flows are discounted to their present value using a pre-tax discount rate. Management applies its best estimate of the range of economic conditions that will exist over the remaining useful life of an asset. Whilst external evidence is favoured, management applies judgement in circumstances where external evidence is limited.

2.2 Residual values and useful lives

The company depreciates its assets over their estimated useful lives taking into account residual values which are reassessed on an annual basis.

The actual lives and residual values of these assets can vary depending on a variety of factors. Technological innovation, product life cycles and maintenance programmes all impact the useful lives and residual values of assets. Residual value assessments consider issues such as future market conditions, the remaining life of the asset and projected disposal values.

2.3 Income taxes

Significant judgement is required in determining the provision for income taxes due to the complexity of legislation and the different tax jurisdictions involved. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The company recognises liabilities for anticipated taxes based on estimates.

Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

The company recognises the net future tax benefit related to deferred income tax assets to the extent that it is probable that the deductible temporary differences will reverse in the foreseeable future. Assessing the recoverability of deferred income tax assets requires the company to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the company to realise the net deferred tax assets recorded at the reporting date could be impacted. Additionally, future changes in tax laws in the jurisdictions in which the company operates could limit the ability of the company to obtain tax deductions in future periods.

2. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES (continued)

2.4 Contingent liabilities

Management applies its judgement to the probabilities and advice it receives from its attorney, advocates and other advisers in assessing if an obligation is probable, more likely than not, or remote. This judgement application is used to determine if the obligation is recognised as a liability or disclosed as a contingent liability.

2.5 Revenue recognition

Revenue from vehicle maintenance plans is recognised only to the extent of the value of parts and services provided, with the balance recognised at the end of the plan.

2.6 Fair value of financial instruments

Basis for determining fair values

Derivatives

The fair values of derivative financial assets and liabilities are calculated by determining the net present value of all future cash flows, discounted at prevailing market curves of the different currencies at reporting date. Only observable market data is used (no estimates) when constructing the curves and basis swap adjustments are added to provide for liquidity in the market. Black-Scholes principles are used for valuing options.

Other non-derivative assets and liabilities

The fair values of other non-derivative financial assets and liabilities are calculated by determining the net present value of all future cash flows, discounted at prevailing market curves of the different currencies at reporting date.

Other financial instruments

The carrying amounts of financial assets and liabilities with a maturity of less than six months are assumed to approximate their fair value.

3. IMPACT OF NEWLY ISSUED STANDARDS AND INTERPRETATIONS

3.1 Newly issued standards – early adopted

There were no standards or interpretations that were early adopted in the current year. The company has adopted the following interpretations and standards which have become applicable in the current financial year:

- IFRS 2 Share based payments
- IFRS 3 Business Combinations
- IFRS 5 Non-current Assets Held for Sale and Discontinued Operation
- IFRS 8 Operating segments
- IAS 1 Presentation of Financial Statements
- IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors
- IAS 10 Events after the Reporting Period
- IAS 16 Property, Plant and Equipment
- IAS 18 Revenue
- IAS 19 Employee Benefits
- IAS 20 Accounting for Government Grants and Disclosure of Government Assistance
- IAS 23 Borrowing Costs
- IAS 27 Consolidated and Separate Financial Statements
- IAS 28 Investment in Associates

3 IMPACT OF NEWLY ISSUED STANDARDS AND INTERPRETATIONS.

3.1 Newly issued standards – early adopted

- IAS 29 Financial Reporting in a Hyperinflationary Economies
- IAS 31 Interest in Joint Ventures
- IAS 32 Financial Instruments Presentation
- IAS 34 Interim Financial Reporting
- IAS 36 Impairment of Assets
- IAS 38 Intangible Assets
- IAS 39 Financial Instruments Recognition and Measurement
- IAS 40 Investment Property
- IAS 41 Agriculture
- IFRIC 15 Agreements for the Construction of Real Estate
- IFRIC 16 Hedges of a Net Investment in a Foreign Operation
- IFRIC 17 Distributions of Non-cash Assets to Owners
- IFRIC 18 ~ Transfers of Assets from Customers

3.2 Newly issued standards and interpretations - not adopted in the current year

The following new or revised IFRS standards and interpretations have been issued with effective dates applicable to future financial statements of the company. Other than new disclosure requirements, these are not expected to have a significant impact on the company's results, unless otherwise stated.

IFRS 1: First Time Adoption of International Financial Reporting Standards

The amendment first becomes applicable to the company for the financial year ending 30 June 2011.

IFRS 2: Share Based Payments

The Amendment relates to company cash-settled share-based payment transactions and clarity of the definition of the term "Company" and where in a company share based payments must be accounted for.

The amendment first becomes applicable to the company for the financial year ending 30 June 2011.

IFRS 3: Business Combinations

The amendments include transition requirements for contingent consideration from a business combination that occurred before the effective date of transition, clarification on the measurement of non-controlling interests and additional guidance provided on un-replaced and voluntarily replaced share based payment awards.

The amendment first becomes applicable to the company for the financial year ending 30 June 2011.

IFRS 5: Non-Current Assets Held for Sale and Discontinued Operations

The amendment is to clarify that IFRS 5 Non-Current Assets Held for Sale and Discontinued Operations specifies the disclosure required in respect of non-current assets (or disposal companys) classified as held for sale or discontinued operations. Consequently, disclosures in other IFRSs do not apply to such assets.

3 IMPACT OF NEWLY ISSUED STANDARDS AND INTERPRETATIONS.

3.2 Newly issued standards and interpretations – not adopted in the current year (continued)

IFRS 7 Financial Instruments: Disclosures

The amendment clarifies the intended interaction between qualitative and quantitative disclosures of the nature and extent of risks arising from financial instruments and removed some disclosure items which were seen to be superfluous or misleading.

The amendment first becomes applicable to the company for the financial year ending 30 June 2011.

IFRS 8: Operating Segments

The amendments are to the Basis of Conclusion, to clarify that an entity is required to disclose a measure of segment assets only if that measure is regularly reported to the chief decision maker.

The amendment first becomes applicable to the company for the financial year ending 30 June 2011.

IFRS 9 Financial instruments

This is a new standard that forms part of a three-part project to replace IAS 39 Financial Instruments: Recognition and Measurement.

The amendment first becomes applicable to the company for the financial year ending 30 June 2011.

IAS 1: Presentation and disclosure of financial statements

The amendment relates to the classification of convertible instruments between current and non-current clarification on the presentation on the statement of changes in equity.

The amendment first becomes applicable to the company for the financial year ending 30 June 2011.

IAS 7: Cash flow statements

The amendment requires that only expenditure that result in a recognised asset in the statement of financial position can be classified as investing activities and contains clarification on expenditures on unrecognised assets.

The amendment first becomes applicable to the company for the financial year ending 30 June 2011.

IAS 17: Leases

The amendment deletes the specific guidance regarding classification of leases of land, this results in land being classified using the general principles of IAS 17, as either an operating or a finance lease.

- 3 IMPACT OF NEWLY ISSUED STANDARDS AND INTERPRETATIONS (continued).
 - 3.2 Newly issued standards and interpretations not adopted in the current year (continued)

IAS 21 The effects of changes in foreign exchange rates

The amendment contains consequential amendments from changes to IAS 27 Consolidated and Separate Financial Statements (clarification on the transition rules in respect of the disposal of an interest in a foreign operation.

The amendment first becomes applicable to the company for the financial year ending 30 June 2011, IAS 24 Related party disclosures

The amendment contains simplification of the disclosure requirements for government related entities and clarification of the definition of a related party.

The amendment first becomes applicable to the company for the financial year ending 30 June 2011.

IAS 27 Consolidated and Separate Financial Statements

The amendment contains transition requirements for amendments arising as a result of IAS 27 Consolidated and Separate Financial Statements

The amendment first becomes applicable to the company for the financial year ending 30 June 2011.

IAS 28 Investments in associates

The amendment contains consequential amendments from changes to IAS 27 Consolidated and Separate Financial Statements

The amendment first becomes applicable to the company for the financial year ending 30 June 2011.

IAS 31 Interest in Joint Ventures

The standard contains consequential amendments from changes to IAS 27 Consolidated and Separate Financial Statements.

The amendment first becomes applicable to the company for the financial year ending 30 June 2011.

IAS 32: Financial Instruments - Presentation

In the amendment, rights, options and warrants otherwise meeting the definition of equity instruments in IAS 32.11 issued to acquire a fixed number of an entity's own equity instruments for a fixed amount in any currency are classified as equity instruments provided the offer is made pro-rata to all existing owners of the same class of the entity's non-derivative equity instruments.

IMPACT OF NEWLY ISSUED STANDARDS AND INTERPRETATIONS (continued)

3.2 Newly issued standards and interpretations – not adopted in the current year (continued)

IAS 34 Interim Financial Reporting

The standard contains clarification of disclosure requirements around significant events and transaction including financial instruments.

The amendment first becomes applicable to the company for the financial year ending 30 June 2011,

IAS 36: Impairment of assets

The amendment clarifies that the largest cash-generating unit (or company of units) to which goodwill should be allocated for the purposes of impairment testing is an operating segment as defined in IFRS 8.5.

The amendment first becomes applicable to the company for the financial year ending 30 June 2011.

IAS 39: Intangible Assets

The amendment is to clarify the requirement under IFRS 3 regarding accounting for intangible assets acquired in a business combination and the description of valuation techniques commonly used by entities when measuring the fair value of intangibles acquired in a business combination that are not traded in an active market.

The amendment first becomes applicable to the company for the financial year ending 30 June 2011.

IAS 39: Financial Instruments - Recognition and measurement

The amendment is to clarify that in repayment options, the exercise price of which compensates the lender the loss of interest reducing the economic loss from reinvestment risk, should be considered closely related to the host debt contract. Amendments have also been made to the scope exemption for clarifying the exemption for business combinations.

The amendment first becomes applicable to the company for the financial year ending 30 June 2011.

IFRIC 19: Extinguishing Financial Liabilities with Equity Instruments

The interpretation addresses the accounting by the entity that issue equity instruments in order to settle, in full or in part, a financial liability.

Equity Compensation Benefits

Eqstra Share Appreciation Rights (SAR) and Deferred Bonus Plan (DBP) Schemes

The SAR scheme allows certain senior employees to earn a long term incentive amount calculated with reference to the increase in the Eqstra Holdings Limited share price between the offer date of the share appreciation rights and the exercise of such rights.

The following share incentive plan was In operation during the financial year

Eqstra Holdings Limited

Date of issue

Date of issue

Date of issue

Period to explry from date of issue
from date of offer

leastlication

1-September-2008

3 years and 14 days

Equity settled

The value of the SAR has been calculated using the Binomial model based on the following assumptions at 1 September 2008.

 Expected volatility
 39.85%
 39.85%

 Expected dividend yield
 4.88%
 4.88%

 Expected forfeiture rate
 14%
 14%

 Vesting period
 3 years and 14 days and 14 days and 14 days
 3 years and 14 days and 14 days

The expected volatility was determined using volatility of similar companies,

The expected forfeiture rate was determined by estimating the probability of participating individuals still being in the employment of Eqstra at vesting date.

The calculation of the share based payment expense requires management to exercise a significant degree of judgement $\frac{1}{2}$

27 Financial instruments

Financial risk factors

The company's treasury activities are aligned to the company's decentralised business model and the asset and liability committee's (ALCO) strategies. The ALCO is a board subcommittee responsible for implementing best practice asset and liability risk management with its main objectives being the management of liquidity, interest rate, price risk and foreign exchange risk. The ALCO meets every quarter and follows a comprehensive risk management process. The treasury implements the ALCO risk management policies and directives and provides financial risk management services to the various divisional businesses, co-ordinates access to domestic and international financial markets for bank as well as debt capital markets funding and monitors and manages the financial risks relating to the operations of the company through internal risk reports which analyses exposures by degree and magnitude of risks. These risks include market risk (including foreign exchange risk, interest rate risk, and price risk), credit risk and liquidity risk. The day-to-day management of foreign exchange risk and credit risk is performed on a decentralised basis by the various business units within the guidelines approved by the board for Egstra Holdings Limited.

The company's objectives, policies and processes for measuring and managing these risks are detailed below.

The company seeks to minimise the effects of these risks by matching assets and liabilities as far as possible or by using derivative financial instruments to hedge these risk exposures. The adherence to the use of derivative instruments and exposure limits is reviewed on a continuous basis and results are reported to the audit committee.

The company does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes. The company enters into financial instruments to manage and reduce the possible adverse impact on earnings of changes in interest rates and foreign exchange rates. Compliance with policies and exposure limits is reviewed by the internal auditors annually, with the results being reported to the audit committee.

Market Risk

This is the risk that changes in the general market conditions, such as foreign exchange rates, interest rates and commodity prices may adversely impact on the company's earnings, assets, liabilities and capital.

The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk. The company's activities expose it primarily to the financial risks of changes in foreign currency exchange rates, interest rates and equity prices.

Currency risk

This is the risk of losses arising from the effects of adverse movements in exchange rates on net foreign currency asset or liability positions.

The company undertakes certain transactions denominated in foreign currencies, hence exposures to exchange rate fluctuations arise. In order to manage these risks, the company may enter into transactions, which make use of derivatives. Derivative instruments are used by the company for hedging

The policy of the company is to maintain a fully covered foreign exchange risk position in respect of foreign currency commitments with a few exceptions authorised by the ALCO. Spare parts are settled in the spot market and where specific South African Exchange Control authorisation has been acquired up to 75% of forecasted annual purchases can be covered. The day-to-day management of foreign exchange risk is performed on a decentralised basis by the various business units within the company's hedging policies and guidelines. Trade-related import exposures are managed through the use of natural hedges arising from foreign assets as well as forward exchange contracts.

Financial risk factors (continued) Currency risk (continued)

		Acres de la companya del companya de la companya del companya de la companya de l
	-:1	
Uncovered foreign currency exposure	OIL	Oil
		UII
	THE RESERVE AND ADDRESS OF THE PARTY OF THE	

The company has no uncovered foreign currency exposure.

Fair value is calculated as the difference between the contracted value and the value to maturity at the period end.

The sensitivity of profits to changes in exchange rates is a result of foreign exchange gains/losses on translation of foreign denominated trade receivables and financial assets and liabilities at fair value through profit or loss that are offset by equivalent gains/losses in currency derivatives.

Profit is no more sensitive to movements in currency exchange rates in 2010 than in 2009, as all foreign currency denominated assets and liabilities are hedged through foreign exchange contracts.

Interest rate risk

This is the risk that fluctuations in interest rates may adversely impact on the company's earnings, assets, liabilities and capital.

The company is exposed to interest rate risk as it borrows and places funds at both fixed and floating rates. The risk is managed by matching fixed and floating rate assets and liabilities wherever possible and achieve a repricing profile in line with ALCO directives through the use of interest rate derivatives. The company analyses the impact on profit and loss of defined interest rate shifts - taking into consideration refinancing, renewal of existing positions, alternative financing and hedging.

The company's financial services division, having access to local money markets, provides the subsidiaries with the benefits of bulk financing and depositing. The interest rate profile of total borrowings is reflected in note 14.

The company has entered into interest rate derivative contracts that entitle it to either receive or pay interest at floating rates on notional principal amounts and oblige it to receive or pay interest at fixed rates on the same amounts.

The company's remaining periods and notional principal amounts of the outstanding interest rate derivative contracts are:

	June 2010	June 2009
Pay fixed receive floating	R000	R000
Less than one year	200 000	1 300 000
One to five years	656 000	356 000
	856 000	1 656 000
Pay floating receive inflation		
One to five years	270 000	
Fair value of interest rate swap (liability)/ asset	(27 457)	(31 036)

The impact of a 1% decrease in interest rates will have a negative R16m (2009: R12m) effect on profit or loss.

The impact of a 1% increase in interest rates will have a negative R23m (2009: R40m) effect on profit or loss. The majority of this impact relates to contracts with customers where the contract pricing is only reviewed on an annual basis.

27 Financial instruments (continued) Financial risk factors (continued)

Concentration risk

This is the risk of a single customer exceeding 5% of total company revenue. There is no single customer that accounts for more than 5% of company

Credit risk

Credit risk, or the risk of counterparties defaulting, is controlled by the application of credit approvals, limits and monitoring procedures. Where appropriate, the company obtains appropriate collateral to mitigate risk. Counterparty credit limits are in place and are reviewed and approved by the respective subsidiary to partle.

The carrying amount of financial assets represents the maximum credit exposure. None of the financial instruments below were held as collateral for any security provided

Cash and cash equivalents

It is company policy to deposit short-term cash with reputable financial institutions with high credit ratings assigned by international credit-rating agencies.

Trade accounts receivable

Trade receivables that are neither past overdue nor impaired

Trade accounts receivable consist mainly of a large, widespread customer base. The company monitors the financial position of its customers on an ongoing basis. Creditworthiness of trade debtors is assessed when credit is first extended and is reviewed regularly thereafter. The granting of credit is controlled by the application of account limits. Where considered appropriate, use is made of credit guarantee insurance.

	30 June	30 June
	2010	2009
	R000	R000
Trade receivables that are neither past overdue nor impaired	23 /6/	27 456

Based on past experience, the company believes that no impairment is necessary in respect of trade receivables not past due as the amount relates to customers that have a good track record with the company, and there has been no objective evidence to the contrary.

The credit quality of all derivative financial assets is sound. None are overdue or impaired and the company does not hold any collateral on derivatives. The company's maximum exposure to counterparty credit risk on derivative assets at 30 June 2010 amounted to nil (2009: nil),

Past due trade receivables not impaired

Included in trade receivables are debtors which are past the original expected collection date (past due) at the reporting date and no provision has been made as there has not been a significant change in credit quality and the amounts are still considered recoverable. A summarised age analysis of past debtors is set out below.

	30 June	30 June
	2010	2009
Past Due	R000	R000
Less than 1 month	6 037	4 454
Between 1 - 3 months	6 166	12 767
	12 203	17 221

The overdue debtor ageing profile above is typical of the industry in which certain of our businesses operate.

No significant collateral was held by the company as security and other enhancement over the financial assets during the year

Provision for doubtful debts for loans and receivables

Before the financial instruments can be impaired, they are evaluated for the possibility of any recovery as well as the length of time at which the debt has been long outstanding. Provision is made for bad debts on trade accounts receivable. Management does not consider that there is any material credit risk exposure not already covered by credit guarantee or a bad debt provision. There were no allowances for impairments on long-term receivables or investments in equity instruments at cost during the period under review.

Analysis of provision for doubtful debts Provision for doubtful debts

	30 June	30 June
	2010	2009
Set out below is a summary of the movement in the provision for doubtful debts for the year	R 000	R 000
Balance at beginning of the year	12 388	13 224
Amounts written off during the year	(19 506)	(15 347)
Increase in allowance recognised in profit or loss	27 634	15 011
Balance at end of year	21 016	12 888

There is no significant concentration of risk in respect of any particular customer or industry segment

27 Financial instruments (continued)

Other receivables

The credit quality of all derivative financial assets is sound. None are overdue or impaired and the company does not hold any collateral on derivatives. The company's maximum exposure to counterparty credit risk on derivative assets at 30 June 2010 amounted to Rnil (2009: nil)

The company may require collateral in respect of the credit risk on derivative transactions with a third party. The amount of credit risk is the positive fair value of the contract. The amount of credit risk is the positive fair value of the contract. Collateral may be in the form of cash or in the form of a lien over a debtors assets, entitling the company to make a claim for current and future liabilities.

These transactions are conducted under terms that are usual and customary to standard lending and borrowing activities.

No financial assets were re-pledged during the year under review for collateral purposes.

Guarantees

The company did not during the period obtain financial or non-financial assets by taking possession of collateral it holds as security or calling on quarantees.

There were no guarantees provided by banks to secure financing during the year

Liquidity risk

Liquidity risk is the risk that the company will not be able to meet its financial obligations as they fall due. The company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under normal and stressed conditions, without incurring unacceptable losses or risking damage to the company's reputation.

The ultimate responsibility for liquidity risk management rests with the board of directors, which has built an appropriate liquidity risk management framework for the management of the company's short, medium an long-term funding and liquidity management requirements.

The company manages liquidity risk by monitoring forecast cash flows in compliance with loan covenants and ensuring that adequate unutilised borrowing facilities are maintained. Unutilised borrowings are reflected in note 14. The company aims to cover at least its net debt requirements through long-term borrowing facilities.

Standard payment terms for the majority of trade payables is the end of the month following the month in which the goods are received or services are performed,

To avoid incurring interest on late payments, financial risk management policies and procedures are entrenched to ensure the timeous matching of orders placed with goods received notes or services acceptances and invoices,

FINANCIAL INSTRUMENTS

The directors consider that the carrying amounts of cash and cash equivalents, trade and other receivables and trade and other payables approximates their fair value due to the short-term maturities of these assets and liabilities.

The fair values of financial assets represent the market value of quoted investments and other traded instruments. For non-listed investments and other non-traded financial assets fair value is calculated using discounted cash flows with market assumptions, unless carrying value is considered to approximate fair value.

The fair values of financial liabilities is determined by reference to quoted market prices for similar issues, where applicable, otherwise the carrying value approximates to the fair value.

There were no defaults or breaches in terms of interest-bearing borrowings during both reporting periods.

There were no reclassifications of financial assets or financial liabilities that occurred during the period. There were no financial assets or liabilities that did not qualify for derecognition during the period.

Capital risk management

The company's objectives when managing capital are to safeguard the company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal mix of liquidity and low cost of capital and to be able to finance future growth.

Consistent with others in the industry, the company monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings less cash and cash equivalents. Total capital includes share capital and borrowings.

During 2010, the company's strategy, which was unchanged from 2009, was to maintain a gearing ratio within 70% to 80% and a A credit rating. The gearing ratios at 30 June were as follows:

	30 Јипе	30 June 2009 R000
	2010	
	R000	
Total borrowings	5 162 915	6 236 683
Less: cash and cash equivalents	192 848	399
Net debt	4 970 067	6 236 284
Total equity	662 428	501 497
Total capital	5 632 495	6 737 781
Gearing ratio (debt to capital)	88%	93%

Included in the statement of changes in equity are the following adjustments relating to financial instruments:

2010	0000
2010	2009
R000	R000
